DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to communication of a printer by requesting print data from the printer, classified in class 358, subclass 1.15.
 - II. Claims 11 and 12, drawn to attribute control by the details of the print acceptance screen, classified in class 358, subclass 1.9.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I discloses a computer requesting print data to be transmitted to the printer.. The subcombination has separate utility such as a printing method that goes into specific details on the print acceptance screen.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
